

Green supply chain management

نویسندگان
علی حاجی احمدی
میڈیا سیاد

سرشناسه : حاجی احمدی، علی ۱۳۶۵ -

عنوان و نام پدیدآور : Green supply chain management/ by Ali Hajiahmadi, Mediya Sayyad.

مشخصات نشر : تهران : آریان قلم ، ۱۳۹۲-۲۰۱۴ م.

مشخصات ظاهری : ۱۳۹ ص. : مصور(بخش رنگی)، جدول، نمودار.

شابک : ۹۷۸-۶۰۰-۷۳۴۶-۰۸-۲

یادداشت : انگلیسی.

وضعیت فهرست نویسی : فیبا

یادداشت : کتابنامه : ص. ۱۲۳-۱۳۹.

موضوع : تدارکات بازرگانی

آوا نویسی عنوان : گرین....

شناسه افزوده : Sayyad, Mediya

شناسه افزوده : صیاد. میدیا. ۱۳۶۷-

ده بندی کنگره : ۱۳۹۲ ۲گ۴ ح ۲۸/۵ HD

رده بندی دیویی : ۶۵۸/۷

شماره کتابشناسی ملی : ۲-۳۴۱۴۴

Green supply chain management

ناشر : آریان قلم

مؤلف : علی حاجی احمدی، میدیا صیاد

ناظرکیفی : نخستین پایگاه مشاوره پژوهشی دانشگاهی (نیکان)

ناظر فنی : محمد سعید زینلیان

چاپ متن : چاپ مهارت

صحافی : رئوف

نوبت چاپ : اول

تاریخ انتشار : ۱۳۹۲

تیراژ : ۱۰۰۰

شابک : ۹۷۸-۶۰۰-۷۳۴۶-۰۸-۲

قیمت : ۵۶۰۰۰ ریال

Table of Contents

Preface	11
chapter 1: Introduction to Green supply chain management.....	13
1.1 Introduction.....	13
1.2 Definition of Green supply chain management	17
1.3 The application status of Green supply chain management.....	18
1.4 The Application of Green Supply Chain Management.....	20
1.4.1 The procurement link of green supply chain.....	22
1.4.2 The construction link of green supply chain.....	22
1.4.3 Payment in Green supply chain	23
1.4.4 The recovery link of green supply chain	24
1.5 conclusions.....	25
chapter 2: Literature Review of Green supply chain management.....	29
2.1 Introduction.....	29
2.2 Importance of green supply chain management.....	31
2.3 Green Design	33
2.4 Green Operations.....	35
2.4.1 Green manufacturing and remanufacturing	35
2.4.2 Reverse logistics and network design	39
2.4.3 Waste management.....	42
2.5 Classification Based on Methodology/Approach.....	43
2.5.1 Empirical Studies	44
2.5.2 Mathematical Modeling	45
2.5.3 Mapping of Tools/Techniques Usedvis-à-vis the Contexts of green supply chain management	48
2.6 evolutionary timeline	51
2.7 Conclusion.....	53

chapter 3: Green supply chain management's methodologies	55
3.1 Introduction.....	55
3.2 Green Design	55
3.2.1 Life Cycle Assessment developed in comparison	56
3.2.1.1 INCORPORATION OF LCA INTO PROCESS DESIGN PROCEDURE	58
3.2.1.1.1 Description of proposed design procedure.....	58
3.2.1.1.2 Detailed description of the activity A4: Evaluate process.....	60
3.2.1.2 Process analysis	61
3.2.1.3 Process evaluation and optimization by LCA	62
3.2.2 Environmental Conscious Design	62
3.2.2.1 Problem Formulation.....	63
3.2.2.2 Multi-Objective Optimization Model	64
3.2.2.3 Illustrative Example.....	67
3.2.2.3.1 Network Description.....	67
3.2.2.3.2 Two Objective Functions	68
3.2.2.3.3 Weighting Factor Sensitivity and Disaggregation.....	69
3.3 Green operation	71
3.3.1 Manufacturing and remanufacturing	73
3.3.1.1The model.....	73
3.3.1.1.1 Technology	73
3.3.1.1.2 Demand functions.....	74
3.3.1.1.3 Industrial structure	76
3.3.1.2 The optimization problem	77
3.3.1.3 Prices and quantities.....	77
3.3.2 Reverse logistics and network design	79
3.3.2.1 Conceptual model	80
3.3.2.2 Mathematical model formulation.....	82
3.3.2.3 Data collection	86
3.3.3 Waste management.....	88

3.3.3.1 Problem statement..... 88

 3.3.3.1.1 Biomass corridor 88

 3.3.3.1.2 Customized fuel energy pack 89

3.4 Green Procurement..... 91

 3.4.1 A sustainable procurement framework 92

3.5 conclusions..... 92

chapter 4: Case study 95

ABSTRACT 95

4.1 INTRODUCTION..... 96

4.2 STATEMENT OF THE PROBLEM 100

4.3 RESEARCH METHOD..... 105

4.4 CONCLUSION and SUGGESTIONS FOR FURTHUR RESEARCHES..... 116

chapter 5: Conclusion 119

References 123

Preface

Logistics and environmental safety are integral parts of our everyday life. Today it influences more than ever a large number of human and economic activities. Sustainable development has made remarkable progress in establishing environmental and social sustainability towards operation management and supply chain. In this book, we try to illustrate some advanced logistics and green supply chain management topics, recently mentioned by academic and industrial personnel. The purpose of this book is to review the literature of the green supply chain management over the last years. This book has been organized in 5 chapters and the key themes that came out from this chapters are : green operation, green design, green manufacturing, reverse logistics and waste management , If someone wants to study the book more deeply, the suggested approach for this study is focus on literature review and study the most important references So the readers of this book may be divided into at least two groups: (1) students in Master's courses or higher, who can use this research in their courses as a whole, and (2) experts who want to learn more about a new topic in green supply chain management;

In the context of global competition, the more latent topics in green supply chain management are fast growing. In this book we also mentioned about Managerial considerations related to planning, justifying, and implementing GSCM and the respective technologies provide some insights into management decisions that will be faced in this environment by presenting a case study. This book falls within this perspective and presents 5 chapters that well illustrate the variety and complexity of these topics.
